2.3. Additional components	23

I. GENERAL INFORMATION

The MCFC series horizontal indoor fan coil combines the characteristics of the previous model with the latest technology from the Western industry. It features a sophisticated design, excellent performance, easy installation and a wide range of applications, and is suitable for use in central air conditioning systems in hotels, office buildings and many other facilities.

1.1. FEATURES

■ **Wide range of applications and full load range**

Thanks to its modern design, this fan coil is ideal for variable load conditions and offers unrivalled performance. It can be used in a wide range of centralised air conditioning applications, such as hotels, hospitals, apartments, villas, office buildings, etc.

■ **Excellent quality**

The device owes its superior quality to its high-quality components. Without exception, all products are subjected to rigorous testing during production and upon shipment from the factory, so you can rely on their quality.

■ **Low noise level**

Brushless DC motor, efficiency up to 70% than AC motor, motor cooling capacity up to 8% higher. At low and medium speeds, the energy consumption of the DC motor is only 23-50% compared to that of the AC motor.

■ **High energy efficiency ratio (EER)**

The device has been optimised to make the most of the energy supplied. This is also facilitated by the motor design with improved thermal conductivity.

■ **Attractive appearance, robust and durable construction**

The fan coil units of this series are made of high quality sheet metal. The condensate tray is made in one piece, without welds or welding points, and is covered with felt insulation on all sides that meets fire safety standards: this gives the unit a symmetrical design and simple shape. The device is designed for flush mounting in typical projects. When designing, leave space for the fan coil unit and provide air outlet, taking into account the furniture in the room, so that the fan coil unit fits into the room layout and is conveniently located.

■ **Easy adjustment and maintenance**

The room air volume and cooling capacity can be easily adjusted to suit your needs - switching between three speeds with a push button or infinitely variable speed control with an external thermostat. The motor bearing is automatically lubricated with oil. The motor shaft is made of hardened and tempered steel, protected against rust by a chrome or nickel-phosphorus coating.

1.2. DESCRIPTION OF FUNCTIONS

Category	N°	Function name
Control function	1	Thermostat
Features for comfort	1	Fast cooling
	2	Three fan speeds
	3	Fast heating up
	4	Humidification (reserved)
Maintaining a healthy environment	1	Removable air filter
	2	Reserved fresh air intake function
Installation	1	Optional drain pipe connection on the left or right
	2	Optional rear or bottom air return
	3	Possibility to adjust static pressure
	4	Optional connection of the connecting pipe on the left or right

II. GENERAL PARAMETERS

2.1. DIMENSIONS OF THE DEVICE

Horizontal installation models without air intake chamber

Model	Overall dimensions (mm)		
	A	B	C
MCFC-034-AT2	510	480	693
MCFC-051-AT2	640	610	823
MCFC-068-AT2	745	715	928
MCFC-085-AT2	830	800	1013
MCFC-102-AT2	960	930	1143
MCFC-136-AT2	1260	1230	1443
MCFC-170-AT2	1410	1380	1593
MCFC-204-AT2	1630	1600	1813
MCFC-238-AT2	1830	1800	2013

Horizontal installation models with rear air intake chamber

Model	Overall dimensions (mm)			
	A	B	C	D
MCFC-034-AT2	510	480	693	420
MCFC-051-AT2	640	610	823	540
MCFC-068-AT2	745	715	928	680
MCFC-085-AT2	830	800	1013	740
MCFC-102-AT2	960	930	1143	860
MCFC-136-AT2	1260	1230	1443	1060
MCFC-170-AT2	1410	1380	1593	1320
MCFC-204-AT2	1630	1600	1813	1520
MCFC-238-AT2	1830	1800	2013	1660

2.2. TABLE OF OPERATING PARAMETERS OF THE DEVICE

2.2.1. Table of fan coil parameters for horizontal flush-mounted installation

Model			MCFC-034-AT2	MCFC-051-AT2	MCFC-068-AT2
Air flow rate	High speed	m ³ /h	340	510	680
	Average speed	m ³ /h	255	382	510
	Low speed	m ³ /h	170	255	340
Cooling capacity	High speed	W	1800	2700	3600
	Average speed	W	1440	2160	2880
	Low speed	W	1170	1755	2340
Heat output	High speed	W	2700	4050	5400
	Average speed	W	2160	3240	4320
	Low speed	W	1755	2633	3510
External static pressure		Pa.	50	50	50
Number of coil rows			2	2	2
Noise level		dB(A)	42	44	46
Fan motor	Number of fans		1	2	2
	Number of engines		1	1	1
	Input power	W	49	66	84
Water consumption		m ³ /h	0,39	0,55	0,7
Drop in water pressure		kPa	12	16	20
Maximum working pressure		MPa	1.6	1.6	1.6
Net weight		kg	17	19	20
Inlet / outlet water pipe			R3/4"(Дy 20)	R3/4"(Дy 20)	R3/4"(Дy 20)
Drain pipe			R3/4"(Дy 20)	R3/4"(Дy 20)	R3/4"(Дy 20)

Note.

1. The cooling capacity was tested under the following conditions: inlet air temperature 27°C dry bulb / 19.5°C wet bulb; inlet/outlet water temperature 7°C / 12°C.
2. The heat output was tested under the following conditions: inlet air temperature 21°C dry thermometer; inlet water temperature 60/55°C.
3. The noise level was tested in a completely echo-free room.
4. These performance and flow rates are given at a static pressure of 30Pa.

Model			MCFC-085-AT2	MCFC-102-AT2	MCFC-136-AT2
Air flow rate	High speed	m ³ /h	850	1020	1360
	Average speed	m ³ /h	638	765	1020
	Low speed	m ³ /h	425	510	680
Cooling capacity	High speed	W	4500	5400	7200
	Average speed	W	3600	4320	5760
	Low speed	W	2925	3510	4680
Heat output	High speed	W	6750	8100	10800
	Average speed	W	5400	6480	8640
	Low speed	W	4388	5265	7020
External static pressure		Pa.	50	50	50
Number of coil rows			2	2	3
Noise level		dB(A)	47	49	50
Fan motor	Number of fans		2	2	3
	Number of engines		1	1	1
	Input power	W	100	118	174
Water consumption		m ³ /h	0,82	0,91	1,34
Drop in water pressure		kPa	23	26	28
Maximum working pressure		MPa	1.6	1.6	1.6
Net weight		kg	22	25	31
Inlet / outlet water pipe			R3/4"(Дy 20)	R3/4"(Дy 20)	R3/4"(Дy 20)
Drain pipe			R3/4"(Дy 20)	R3/4"(Дy 20)	R3/4"(Дy 20)

Note.

1. The cooling capacity was tested under the following conditions: inlet air temperature 27°C dry bulb / 19.5°C wet bulb; inlet/outlet water temperature 7°C / 12°C.
2. The heat output was tested under the following conditions: inlet air temperature 21°C dry thermometer; inlet water temperature 60/55°C.
3. The noise level was tested in a completely echo-free room.
4. These performance and flow rates are given at a static pressure of 30Pa.

Model			MCFC-170-AT2	MCFC-204-AT2	MCFC-238-AT2
Air flow rate	High speed	m ³ /h	1700	2040	2380
	Average speed	m ³ /h	1275	1530	1785
	Low speed	m ³ /h	850	1020	1190
Cooling capacity	High speed	W	9000	10800	12600
	Average speed	W	7200	8640	10080
	Low speed	W	5850	7020	8190
Heat output	High speed	W	13500	16200	18900
	Average speed	W	10800	12960	15120
	Low speed	W	8775	10530	12285
External static pressure		Pa.	50	50	50
Number of coil rows			3	3	3
Noise level		dB(A)	52	54	56
Fan motor	Number of fans		4	4	4
	Number of engines		1	1	1
	Input power	W	210	250	300
Water consumption		m ³ /h	1,59	1,8	2,07
Drop in water pressure		kPa	32	38	42
Maximum working pressure		MPa	1.6	1.6	1.6
Net weight		kg	37	42	44
Inlet / outlet water pipe			R3/4"(Дy 20)	R3/4"(Дy 20)	R3/4"(Дy 20)
Drain pipe			R3/4"(Дy 20)	R3/4"(Дy 20)	R3/4"(Дy 20)

Note.

1. The cooling capacity was tested under the following conditions: inlet air temperature 27°C dry bulb / 19.5°C wet bulb; inlet/outlet water temperature 7°C / 12°C.
2. The heat output was tested under the following conditions: inlet air temperature 21°C dry thermometer; inlet water temperature 60/55°C.
3. The noise level was tested in a completely echo-free room.
4. These performance and flow rates are given at a static pressure of 30Pa.

Note: the above table is the cooling capacity at high speed, the cooling capacity at medium speed and low speed is the value in the above table multiplied by the speed correction factor.

DB — Dry bulb temperature °C

WB — Wet bulb temperature °C

TH — Total heat W

SH — Sensible heat W

Speed correction factor			
Medium		Low	
TH	SH	TH	SH
0,78	0,85	0,54	0,50
