I. GENERAL INFORMATION

The MCFDS series horizontal indoor unit fan coil combines the best of both worlds. It is distinguished by its sophisticated design, excellent performance, easy installation and wide range of applications and is suitable for use in central air conditioning systems in hotels, office buildings and many other facilities.

1.1. FEATURES

■ **Wide range of applications and full load range**

Thanks to its modern design, this fan coil is perfect for variable load conditions and offers unrivaled performance. It can be widely used in centralized air conditioning systems such as hotels, hospitals, apartments, villas, office buildings, etc.

■ **Excellent quality**

Reliability and durability: generate less heat during operation, reducing the risk of overheating and increasing reliability.

■ **Low noise level**

It is significantly quieter, with smooth operation ensuring silence at night. Special C-shaped design reduces sound energy by 37%.

■ **High energy efficiency ratio (EER)**

Energy efficiency: The brushless DC motor (DC type) has an efficiency up to 70% higher than the AC motor (AC type). At low to medium airflow rates, the power consumption of the DC motor is only 23-30% of that of the AC motor, saving operating costs.

■ **Attractive appearance**

The fan coil units of this series are made of high quality galvanized aluminum sheet metal, which provides greater durability. Built-in condensate drainage channels prevent condensation from flowing to the ceiling due to poor thermal insulation at the joint. The device is designed for flush mounting in typical projects.

■ **Convenient adjustment**

The air volume and airflow rate can be adjusted at will by switching between speeds using an external thermostat.

Heat exchanger

Innovative design of the V-type condenser structure, the air outlet area is 25% larger than the traditional one according to aerodynamics, the air flow of the V-type condenser is more linear to avoid the formation of swirl.

1.2. DESCRIPTION FUNCTIONS

Category	N°	Function name
Control function	1	Thermostat with Wi-Fi function / with Modbus function
Function for comfort	1	Fast cooling
	2	
	3	Fast heating up
	4	Air ventilation
Maintaining a healthy environment	1	Removable air filter
Installation	1	Connecting the drain pipe on the left
	2	Rear or bottom air return to choose from
	3	Possibility to adjust static pressure
	4	Connecting the connecting pipe on the left

II. GENERAL PARAMETERS

2.1. DIMENSIONS OF THE DEVICE

Horizontal installation models

Model	Overall dimensions (mm)		
	A	B	C
MCFDS-034-AT2	460	498	572
MCFDS-051-AT2	710	748	822
MCFDS-068-AT2	710	748	822
MCFDS-085-AT2	880	918	992
MCFDS-102-AT2	880	918	992
MCFDS-119-AT2	940	978	1052
MCFDS-136-AT2	1270	1308	1382

2.2. TABLE OF OPERATING PARAMETERS OF THE DEVICE

2.2.1. Table of fan coil parameters for horizontal flush-mounted installation

Model			MCFDS-034-AT2	MCFDS-051-AT2	MCFDS-068-AT2	MCFDS-085-AT2
Air consumption	High speed	m ³ /h	340	510	680	850
	Average speed	m ³ /h	255	382	510	638
	Low speed	m ³ /h	170	255	340	425
Cooling capacity	High speed	W	1800	2700	3600	4500
	Average speed	W	1440	2160	2880	3600
	Low speed	W	1170	1755	2340	2925
Heat output	High speed	W	2700	4050	5400	6750
	Average speed	W	2160	3240	4320	5400
	Low speed	W	1755	2633	3510	4388
External static pressure		Pa	30	30	30	30
Noise level		dB(A)	39	40,5	43	45,5
Fan motor	Number of fans		1	2	2	2
	Number of engines		1	1	1	1
	Input power	W	26	34	42	51
Water consumption		m ³ /h	0,39	0,55	0,7	0,82
Drop in water pressure		kPa	12	16	20	23
Maximum working pressure		MPa	1.6	1.6	1.6	1.6
Net weight		kg	16	18	18	21
Inlet / outlet water pipe			R3/4"	R3/4"	R3/4"	R3/4"
Drain pipe			DN20	DN20	DN20	DN20

Note.

1. The cooling capacity was tested under the following conditions: inlet air temperature 27°C dry thermometer / 19.5°C wet thermometer; inlet/outlet water temperature 7°C / 12°C.
2. The heat output was tested under the following conditions: inlet air temperature 21°C according to a dry thermometer; inlet water temperature 60/55°C.
3. The noise level was tested in a completely echo-free room.
4. These performance and flow rates are given at a static pressure of 30Pa.

Model			MCFDS-102-AT2	MCFDS-119-AT2	MCFDS-136-AT2
Air consumption	High speed	m ³ /h	1020	1360	1700
	Average speed	m ³ /h	765	1020	1275
	Low speed	m ³ /h	510	680	850
Cooling capacity	High speed	W	5400	7200	9000
	Average speed	W	4320	5760	7200
	Low speed	W	3510	4680	5850
Heat output	High speed	W	8100	10800	13500
	Average speed	W	6480	8640	10800
	Low speed	W	5265	7020	8775
External static pressure		Pa	30	30	30
Number of coil rows			2	3	3
Noise level		dB(A)	47	48	48
Fan motor	Number of fans		2	3	4
	Number of engines		1	1	1
	Input power	W	65	73	91
Water consumption		m ³ /h	0,91	1,21	1,34
Drop in water pressure		kPa	26	27,6	28
Maximum working pressure		MPa	1.6	1.6	1.6
Net weight		kg	21	25	30
Inlet / outlet water pipe			R3/4"	R3/4"	R3/4"
Drain pipe			DN20	DN20	DN20

Note.

1. The cooling capacity was tested under the following conditions: inlet air temperature 27°C dry thermometer / 19.5°C wet thermometer; inlet/outlet water temperature 7°C / 12°C.
2. The heat output was tested under the following conditions: inlet air temperature 21°C according to a dry thermometer; inlet water temperature 60/55°C.
3. The noise level was tested in a completely echo-free room.
4. These performance and flow rates are given at a static pressure of 30Pa.
